

## Training Course on

### “Establish greenhouse gas reduction targets: Science-based approach”

In the view of the increasing risks associated with climate change, greenhouse gas (GHGs) reduction is now at the top ESG's agenda of institutional investors. Companies are being scrutinized whether they have set and report GHG targets. Setting climate science-based targets (SBTs) could provide companies with clearly well-defined and future-proven goal to reduce GHGs.

Green Council would like to invite environmental, engineering and building management professionals to join us live in an exclusive interactive online training which will focus on the process of setting GHG targets by adopting SBTs.

#### Details

Content of Session 1:

- Introduction / Benefits of setting SBTs
- Understand SBT setting methods and components

Date and Time: 14:00-17:00 on Wednesday, 11<sup>th</sup> May 2022
